## 1. Drawings and parts lists

### ❖ Chlorine Emergency kit

The Chlorine Emergency Kit provides immediate control over chlorine gas leaks from cylinders during emergencies, safeguarding personnel, minimizing environmental risks, and ensuring safe operational continuity at water treatment facilities.

### Key Components and Uses

No.	Component	Primary Use
1	Valve Leak Containment Device	Seals leaks around the cylinder valve to prevent gas escape .
2	Fusible Plug Sealing Clamp	Clamps and seals leaks from the fusible plug in the valve assembly .
3	Side Wall Patching Device	Patches and contains leaks or cracks in the cylinder's side wall .
4	Hand Tools & Sealing Accessories	Supports installation with wrenches, plugs, straps, and gaskets for various leak scenarios .
5	Instruction Manuals	Guides safe step-by-step application and safety protocols for each device .
6	Storage Toolbox	Organizes and protects all items for quick access during emergencies .

### Final Notes

This document provides the approved drawings, layouts, and dimensions of the unit. For any additional technical information or services, please contact [ChloroMaster].
